

The Compact Door Inspiration book

Discover the Compact® Door.

30 years of innovation

Rolflex has stood for quality, innovation and custom solutions in the field of industrial doors for over 30 years. With the introduction of the Compact door, we have created a fully-fledged alternative to conventional sectional doors: a space-saving, aesthetically attractive and versatile solution that is used in countless projects worldwide.

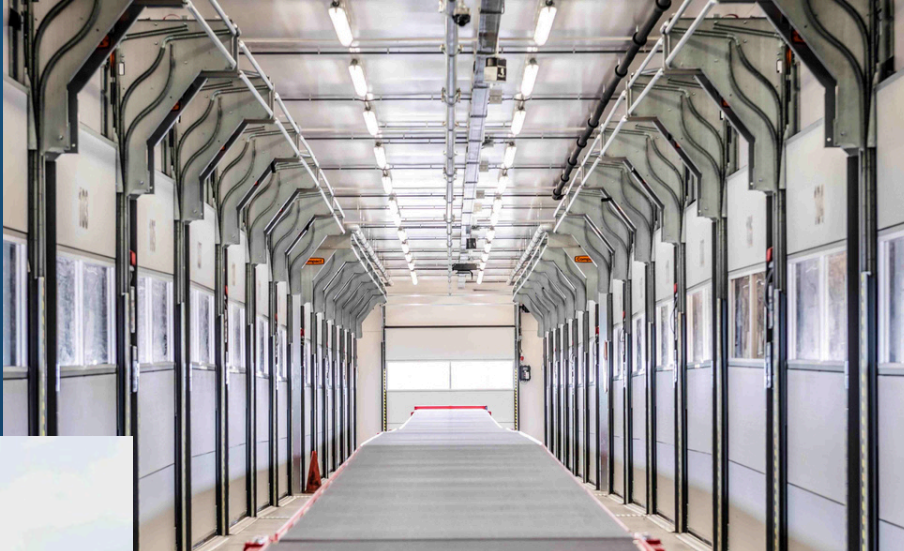

This inspiration book presents a selection of completed projects with the Compact door. From elegant architectural solutions to functional industrial applications and complex custom constructions – be inspired by the many possibilities offered by our unique door solution. We invite you to discover the world of Compact doors – thanks to 30 years of experience, development and enthusiasm for advanced technology.

Compact

In a world where every space is unique, standard solutions are not enough and form is as important as function, the Compact Door offers something unique: a door that fully adapts to the space, the user and the design.

*Project: DHL - DC Schiphol
Airport, Amsterdam,
Netherlands*

Suits you

We are here for architects who want to push boundaries, for contractors who strive for space saving, for door dealers who have trusted quality for years, and for customers who are looking for a perfectly fitting solution. And we believe that technology is only truly powerful when it fits perfectly. Together with you. On location. With your vision. That's where we come in:

Creating the perfect fit

Fits in your space

Seamless integration

Ceiling integration for a beautiful finish.

The door panels fold over the door opening. The folding package, including the motor, can be integrated into the ceiling, making the **Compact door** virtually invisible when open.

*Project: Car dealer Sarsa,
Terrassa, Spain*

Maximum use of space

No two spaces are the same. Sometimes the space above the opening is limited, sometimes there are pipes, crane tracks, sprinklers or lighting that a standard door simply won't fit into.

The unique folding system of the **Compact Door** allows you to make optimum use of the entire space.

*Project: Attas GmbH
Waiblingen, Germany*

Fits your vision

Show

The **Compact door** offers clean lines, custom colours and finishes, and even glazing – perfectly integrated into any facade. No distracting rails or bulky technology in sight, just a minimalist design that fits perfectly with the building.

Project: McLaren Technology Centre, United Kingdom

Project: Audi Huiskes Kokkeler Netherlands

*Project: Mercedes Baan
Netherlands*

Fits your needs

*Project: Spray booth Elpo
Netherlands*

Whether it is a car garage, factory hall, showroom or emergency post – **the Compact** Door adapts to every application. Fully customizable in size, operation and functionality, it ensures that every user gets what he needs. The door is also quiet, safe, durable and quick to install.

Project: Fire station Hoevelaken
Netherlands

Get inspired

Create projects where it once seemed impossible. The **Compact Door** offers solutions where standard doors are not enough. Be inspired by these possibilities and application examples.

*Project: Van Mossel KfZ,
Netherlands*

Outdoor installation

Project: Private swimming pool, Netherlands

If you need all the space inside, you can mount the door on the outside. All moving parts are then outside the room or even outside the building. This option is often used for spray booths and car washes.

*Project: RAW Studios,
Berlin, Germany*

*Project: Car Dealer Melbourne,
Australia*

*Project: Museum Depot
Boijmans, Rotterdam,
Netherlands*

*Project: Maintenance of
public transport MIVB-STIB,
Brussels, Belgium*

Partition walls

Thanks to its compact size, sleek finish and silent operation, the **Compact Door** can also be used to separate spaces in buildings. Use the door as an innovative partition wall in industrial, commercial or public spaces.

Easy access

Allow employees or customers to enter the building comfortably by adding a pedestrian door. Save energy by keeping the large gate closed upon entry. Be surprised by the variety of pedestrian door options.

*Project: Private
Garage Kuwait*

Renovations

When replacing existing gates, you want to improve your building without compromising the outdoor space. Compact gates can replace any type of gate.

When replacing roller shutters, consider a **Compact door**. Better insulation, the option of glazing and a pedestrian door are all in the same installation space.

*Project: Car dealer Bavel,
Netherlands*

Opportunities instead of limitations

We hope this brochure has given you a good impression of the versatility of the **Compact door**. At Rolflex we strive to offer a solution-oriented door that gives you possibilities instead of limitations. Less complexity, more space and freedom in your design.

How our story unfolded

Somewhere in the late nineties our owner was faced with a problem. He did not have the right fitters to install the Rolflex sectional doors. Installing these sectional doors was time-consuming and hard work. He decided to develop a door that was easier to install.

problem solved This new door featured a unique folding system that eliminated the need for technicians to install a ceiling track hanger. One technician was able to install this new door in just a few hours. Problem solved.

Space-saving benefits Rolflex soon discovered that this door offered more benefits than just ease of installation. The door had no ceiling rails, allowing the new door to fit where other doors would not. The door was called the **"Compact Door"**.

Innovation and expansion. From that moment on, the Compact door was continuously developed and improved. At the same time, more and more architects and builders worldwide discovered the door. Today, a growing network of resellers ensures excellent service to customers worldwide.

Custom made
