Compact®

Showroom doors

By Rolflex

In your car dealership, your focus is on the customer experience. So is ours

Imagine doors that welcome your clients with open arms, creating an inviting space that elevates every visit. It's time to unlock the full potential of your showroom. With Compact® doors, you blend sleek design with functionality, giving your business more room for growth.

Our doors offer design freedom—no bulky ceiling rails, more natural light, and a seamless look. This enhances the client experience while showcasing your vehicles in the best possible light. It's not just about aesthetics; it's about creating a space where clients feel welcome, boosting satisfaction and commercial success.

Together, let's create an environment where your business and your clients thrive.

Let's make room for success together.

Your benefits

All eyes on the cars. **Compact® doors blend in.**

In your showroom, all eyes should be on the cars. The Compact® showroom door seamlessly blends into the space, with its sleek, minimalist design and no bulky rails to distract the eye. Its discreet appearance ensures that all attention remains on the cars, letting your inventory shine.

This door enhances the atmosphere with ideal natural light, creating an inviting space while leaving

the ceiling clear for lighting. The glass panels showcase your inventory, while translucent panels hide areas of less interest.

All Compact® doors are custom-made in our own factory to match the design of your space. As a result, we can offer you a wide range of design options, sizes, colours and more to make sure you get a door that fits your needs.

Invisible perfection

The door panels and motor can be neatly tucked away in a cove in the ceiling. When opened, the door is almost invisible.

The **integrated hinges** ensure a sleek and clean door design that integrates well in a modern and

minimalist environment. Enjoy the freedom of choice in colours and panel materials in order to give your showroom the finish that reflects your company's high quality.

Create a pleasant **atmosphere**

With its advanced construction, the door provides superior temperature and sound insulation, maintaining a comfortable and quiet environment. Its smooth, quiet performance ensures minimal disruption in your showroom, creating a calm, professional environment.

Whether used as a partition or to enhance the aesthetics of new car delivery spaces, its flexible design adapts to your needs.

Long term commitment

The current Compact® door is the best yet, representing the third generation of advanced technology. Backed by decades of experience and certified by TÜV for 100,000 cycles, the Compact® door guarantees long-term reliability and performance.

The folding system is free of balancing springs, which directly lowers your maintenance costs in comparison with standard sectional doors.

The standard integrated automatic lock keeps unwanted visitors at bay, so that your valuable inventory is safe.

Your options

Transparent
(Full vision)

Semi-transparent
(Full light)

Sandwich panels

Combination

Panel segments

Depending on the width of the door, you can decide how many segments you want in the door panel. Glass panels may also be combined with sandwich panels.

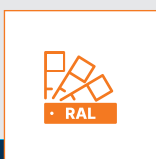

Glass options

Transparent panels can contain many types of materials, From transparent polycarbonate or acrylic panels to safety glass to semi-transparent multiwall sheets. Compact® doors may also be fitted with sandwich panels. Mix and match them and design the door you want.

Colours

For the ultimate finish, colour your profiles, rails and other parts in the colour of your choice. All RAL colours are available.

Your creativity is the limit!

All RAL colours

Versatility for your dealership

Compact® doors are not only highly useful for showrooms but can also be utilized in various areas within your dealership. Below are some examples:

Compact® Workshop Doors

Compact® Service Doors

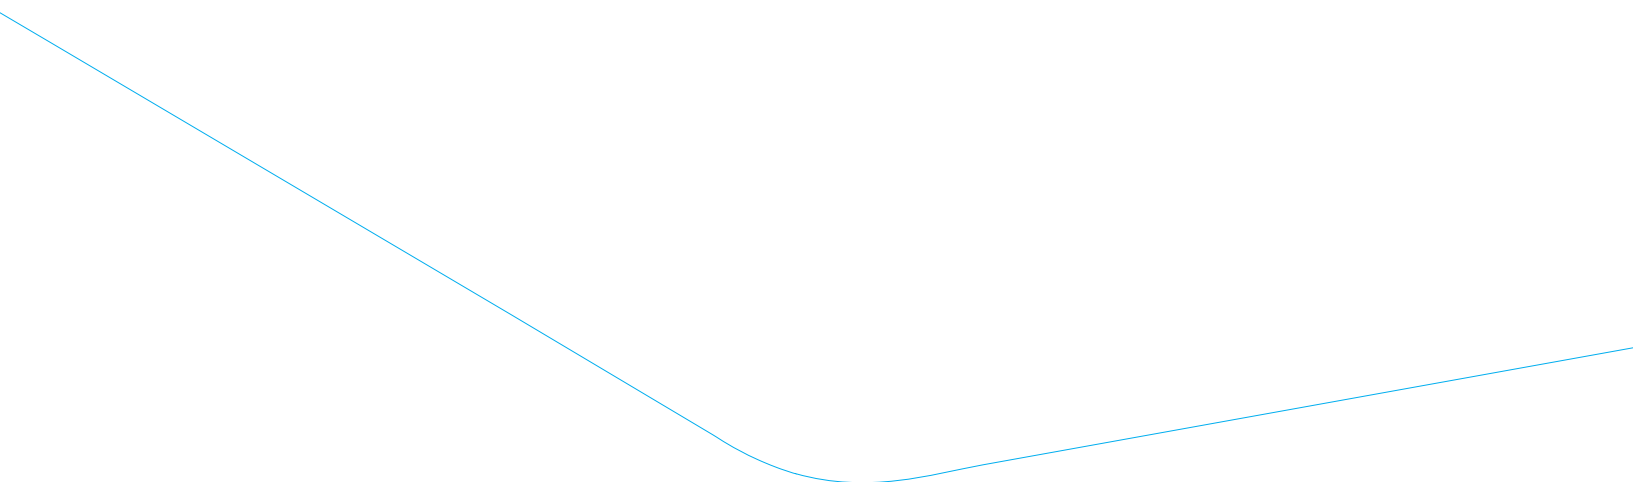

Compact® Spray booth doors

Compact® Car wash doors

Installation & **service**

Satisfied customers, trouble-free lifespan.

You may not realize it right away, but every showroom door is an essential part of your business operations. A non-functioning door can have a major impact on your business.

A Compact® door will last a long period of time. Professional installation and service are important contributors to a successful and trouble-free lifespan.

Installation and servicing

Our worldwide network of support partners is at your service. We are more than happy to introduce you to a skilled professional in the required region.

customer experience

Compact® & safety

Fall safety

Prevents damage or injury in case the steel cables break.

Automatic lock

Prevents unauthorized access, especially crucial when used as an exterior door.

Anti-trap protection

Compact® doors with automatic closing systems are equipped with a Isafety system which will ensure nothing or no one gets trapped underneath a closing door.

Slack cable protection

Prevents damage to the door when the door gets obstructed and/or cable tension is lost.

All Compact® doors are compliant with
European Safety Standards

EN 12604

EN 12453

NEN 13241-1

CE-certified

Technical specifications

Min/Max dimensions

Max dimensions for a fully transparent door are 6000 mm wide and 7960 mm high. Wider doors are possible in combination with sandwich panels.

Characteristics of the profiles

Aluminium profiles with vertical sections. Panel thickness 40 mm, height 610 mm. Top panel height can be adjusted to fit the door opening.

Sealing on all sides

The door opening is sealed off by rubber seals on all 4 sides and in between the panels.

Invisible hinges

Hinges are positioned invisibly between the panels for a clean finish on both sides of the door.

Dimensions of top space and depth Depth of the door package : 730 mm

Additional top space (above the door opening) required depends on the height of the door:

< 3080 mm	: 420 mm
3081 - 4300 mm	: 520 mm
4300 - 5520 mm	: 630 mm
5521 - 6740 mm	: 770 mm
6741 - 7960 mm	: 890 mm

Your choice of accessories, motor position etcetera may have an impact on the top space and depth needed.
