DOOR SOLUTIONS

INSPIRATION

Compact[®]

FOLDING DOOR

The Compact folding sectional door offers a unique door solution for both commercial and industrial buildings. The compact footprint and numerous design options allow you to incorporate this door in almost any project.

Compact

Problem-solver

This folding sectional door does not have overhead rails. This makes the Compact door fit where others do not. A compact, well-insulated door solution for any complex design situation.

Project: DHL - DC Schiphol
Airport, Amsterdam, The
Netherlands

Seamless integration

Ceiling integration for a clean finish.
The door panels fold up above the door opening. The folding package, including motor, can be integrated in the ceiling, making the door almost invisible when opened.

Project: Car dealership
Sarsa, Terrassa, Spain

BUS 6,3t

Maximum use of space

Freely use the full space for cranes, storage or installations. All space behind the door opening can be used without limitations.

Allow high vehicles to pass freely or use crane tracks to load or unload at the door. Install extractions systems, sprinklers, mezzanine floors and lighting wherever you want. Design freedom at its best.

Project: Attas GmbH -
Waiblingen, Germany

Blending in

Its small footprint will make the door almost invisible when opened. Let the the door blend in with the design of the building by matching colours and materials.

Project: McLaren
Technology Centre, United
Kingdom

Project: Van Mossel car
worskhop Rotterdam, The
Netherlands

External use

Have the door installed externally in case you need all the space inside. All moving parts are outside of the room, or even outside of the building. This option is widely used in spray booths and car wash stations.

Project: Private swimming
pool, The Netherlands

Project: RAW studios,
Berlin, Germany

Project: Car dealership,
Melbourne, Australia

Project: Museum depot Boijmans,
Rotterdam, The Netherlands

Project: Public transport maintenance
MIVB-STIB, Brussels, Belgium

Internal sections

Due to its Compact size, clean finish and silent operation, the door can also be used for sectioning off spaces in buildings. Use the door in either an industrial, commercial or a public space as an innovative partition wall.

Easy access

Allow employees or clients to enter the building with ease by adding a wicket door. Save energy by keeping the large door shut while entering the building. Let the large number of wicket door options amaze you.

Project: Private garage
Kuwait

Renovations

When replacing existing doors, you want to improve your building without compromising on free space. Compact doors can replace any type of door: sliding doors, sectional doors and roller shutters. You can even upgrade your whole facade like this client did.

Options, not limitations

In this booklet, we hope to have given you a good impression of the versatility of the Compact door. At Rolflex we aim to offer a solution-oriented door that gives you options instead of limitations. Less complex, more space and freedom in your design.

Our story unfolded

Somewhere in the late '90s, our owner and founder Joost Megens was confronted with a problem. There were not enough mechanics to install the sectional doors that Rolflex delivered at that time. Installation of these sectional doors was time-consuming, hard work. He decided to develop a door that would be easier to install.

Problem solved

This new door had a unique folding system, so the mechanics did not have to install a frame for overhead rails. A single mechanic could install this new door in a couple of hours. Problem solved!

Space-saving benefits

Very soon, Rolflex discovered that this door had more benefits than just easy installation. The door had no overhead rails, which made the new door fit where other doors could not. The door was given the name "Compact door".

Innovation and expansion

From that moment on, the Compact door has continuously been developed and improved. At the same time, the door was getting noticed by architects and builders around the world. A growing network of resellers ensures good service for clients everywhere.

Made to order

All Compact doors are custom-made for every client

in the Rolflex Factory

Based in the Netherlands

and available worldwide
